

WHISPER HOUSE: ESCAPE THE WATCHER

FULL GAME DESIGN DOCUMENT

Platform: Android / iOS

Engine: Unity

1. HIGH CONCEPT

A mobile stealth horror game where players escape a haunted house while being hunted by a blind monster that reacts to sound.

2. DESIGN PILLARS

- Simple controls
- Sound-based stealth
- High replayability
- Short-session tension

3. CORE GAMEPLAY LOOP

- Sneak through house
- Collect tools and keys
- Avoid making noise
- Hide or distract monster
- Escape

4. NARRATIVE OVERVIEW

The player is trapped inside a haunted house stalked by The Watcher, a blind entity that hunts using sound alone.

5. PLAYER MECHANICS

Walk, crouch, hide, throw objects.

6. CORE SYSTEMS

Sound detection AI, randomized patrols, difficulty scaling.

7. ENEMY DESIGN

The Watcher learns player behavior and reacts to sound cues.

8. LEVEL DESIGN

Multi-floor house with multiple escape paths.

9. ENDINGS

- Successful Escape
- Captured Ending
